

980nm Diode laser

vein removal machine

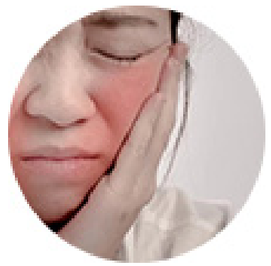

Vascular removal
Blood Spider clearance
Spots removal

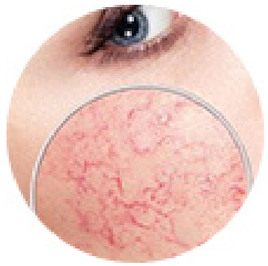

BM08

Improvement of redness and other problems

The skin is soothing and the cuticle is thick, not dry and not tight, and the skin recovers faster.

The skin can regain self-recovery after being stimulated by cold preheating, and the red blood begins to slowly disappear, and the skin recovers whitening.

The skin becomes moist and the bloodshot disappears completely.

5 ADJUSTING RING FOR YOUR CHOOSE

0.2mm 0.5mm 1.0mm 2.0mm 3.0mm

0.2/0.5MM SPOT SIZE:
Facial spider vein removal

1.0MM SPOT SIZE:
Body spider vein removal

3.0MM SPOT SIZE:
Vascular vein removal

2.0MM SPOT SIZE:
Skin tag removal

EIGHT CHARACTERISTICS

- ENOUGH ENERGY
- NARROW PULSE WIDTH
- HIGH CONFIGURATION
- HIGH STABILITY
- SHORT RECOVERY TIME
- OBVIOUS EFFECT
- HIGH PEAK POWER
- FAST LIGHT

FOUR ADVANTAGES

- Fast and safe
- Simple and effective, safe
- Non-invasive, comfortable and painless
- Deeply obvious repair skin

PRINCIPLES OF TREATMENT

Directional conduction targeting is applied to capillaries

Instant blasting hemoglobin in capillary

The red blood is gradually disappearing

Operation interface

Specification

Technology Parameters

Output: Fiber-optic coupling

Input: AC:100-240V 50/60Hz

Laser Wavelength & Output Power:
980nm 20W(Customizable)

Length of Fiber:
2 m

Operation interface:
8.0 inch

Frequency:
1-5HZ

Flight case Dimensions
420mm*335mm*340mm

Mode: Pulse mode

Language: English or OEM

Aiming Beam:
650nm

Cooling:
Air cooling

Pulse width:
15ms-100ms

Machine Dimensions:
290mm*290mm*200mm

Net/Gross weight:
8KG/10KG

ACCESSORIES

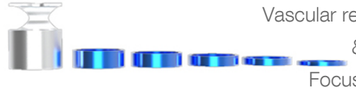

Instrument

Eye mask

Ice compress hammer

Vascular removal plug
&
Focus Ring

Others:
Manual

Foot pedal & Power Line

Supports all countries and regions

Flight case:
420*335*340mm
